

APPENDIX 19-III

Authorized Aggregate Resource Licenses and Permits and MTO Authorized Aggregate Permits

1.0 INTRODUCTION

Aggregate resources in the Province of Ontario are regulated under the *Aggregate Resources Act*, where aggregate activities occur on provincial Crown lands and most private lands (Government of Ontario 2016b). The MNRF is responsible for the management of aggregate resources including the issuing of permits and licenses, inspection of operations, compliance, and ensuring rehabilitation. A permit is required to extract aggregate on Crown land and a licence is required to extract aggregate on private land in specific areas designed in the *Aggregate Resources Act* (i.e. Aggregate Designated Areas).

The Ministry of Transportation (MTO) also maintains aggregate pits to provide the material necessary to build roadways in the province. *Policy A.R. 1.00.08, Delegation of Authority: MTO* (2000) delegates duties and powers of the MNRF to the MTO for the issuance and management of wayside permits and aggregate permits for provincial road projects (MNRF 2000).

The Project's Commercial (Industrial) Land and Resource Use Local Study Area (LSA) overlaps 61 aggregate permits and licenses on provincial and private lands (Table 19-III-1). Of these, 61 permits and licenses, 6 directly overlap the Project footprint (Table 19-III-2).

The Project's Commercial (Industrial) Land and Resource Use Local Study Area (LSA) overlaps 22 MTO aggregate permits (Table 19-III-3). Of these 22 permits, 4 directly overlap the Project footprint (Table 19-III-4).
